

Your factory-direct partner.

Our team in Australia works with an experienced team in China and highly professional specialist glass factories. Years of glass-sourcing experience and established relationships support highly competitive factory-direct pricing. Use this guide to compare your existing supply or explore a custom bottle project.

AI-generated bottle concept. It does not show a supplied product or customer project.

CHOOSE THE CONVERSATION THAT HELPS YOU MOST

01 / CURRENT SUPPLY + BACKUP PLAN

Compare my existing supply

Share your current bottle and closure specification, quantity and delivery destination. Get a comparative quote within five business days once the details needed for a like-for-like comparison are available.

Check the total cost and build an alternative sourcing plan, whether or not you change your current supplier.

02 / CUSTOM PROJECT

Explore what is possible.

Bring an idea, a reference photo or a bottle you want to improve. Explore shape, colour, texture, embossing and the closure as a complete design.

We work through the suitable factory options, samples, specification and quotation for your project.

Give the bottle a job. What should a customer notice on the shelf or back bar? Think about proportions, glass colour, texture, label space and the way the closure feels. Existing shapes, decorated bottles and custom glass are all starting points to discuss.

Bottle shapes and decoration options are design directions to explore. Availability and suitability are checked for your brief. Reserve sources glass; we do not make it.

Know what is included. Compare like for like.

A useful comparison starts with the same bottle, closure, quantity and delivery destination. Use these checks to see where two offers match and where they differ.

DETAIL TO COMPARE	KEEP THE BASIS CONSISTENT	YOUR NOTES
Bottle specification	Capacity, dimensions, weight, glass colour, finish, decoration and agreed quality requirements.	
Matched closure	Neck finish, cork, stopper or cap, seal or liner, and intended product use.	
Order quantity	The same number of complete bottle-and-closure sets, with packing quantities identified.	
Setup + tooling	State sample, design, decoration and tooling charges separately from repeat-order costs.	
Packing + delivery	Protective packing, freight and destination charges to the same nominated site.	
Quote basis	Total delivered cost, GST basis, inclusions, exclusions and any items still awaiting confirmation.	

FOR CURRENT SUPPLY

Bring the specification.

A current drawing, specification, bottle photo and closure details make the comparison more useful. Add the quantity, delivery postcode and current quote if you would like us to compare the full offer.

FOR A CUSTOM PROJECT

Show us the direction.

What do you want the bottle to say about the drink? Bring references and identify what you like. We explore suitable options, then agree samples and checks for the bottle and closure together.

A backup plan.

A comparison can give you another sourcing route while you keep your current supplier. The goal is a clear view of the options and a practical next step.

Optional labels or product cartons: include these in the brief if needed, then confirm the scope, dimensions, artwork and quotation. Your filling team should check handling and fit for the intended use before approving a bottle and closure combination.

What do you want your next bottle to do?

Print this page and bring it to the next conversation. Estimates are fine. A photo of your current bottle or a direction you like is a useful starting point.

I would like to:

☐ Compare my existing supply ☐ Explore a custom project

Brand / business and your name

Spirit or liqueur / product range (and the customer or price position)

Bottle capacity and approximate quantity

Delivery suburb / postcode

Current bottle or reference photo / drawing

Current delivered cost (if known)

What matters most?

☐ Complete cost ☐ A backup supplier ☐ Reliable supply ☐ A distinctive bottle

Shape, colour, finish and references (what to keep or change)

Closure, seal and filling / handling requirements

Labels, product cartons or other details to discuss (optional)

What would make this useful? / questions for the team

A PRACTICAL NEXT STEP

Continue the conversation.

Call or text our team about a comparative quote
or the bottle you want to create.
